DIGITAL LITERACY PROJECT REPORT

Introduction

Task 1 – Infographic

Task 2 – Profiles

Task 3 – Coding Platform

Task 4 – Email Etiquette

Task 5 – Cybercrime Awareness

Conclusion

Name: Amar Kalmodiya

Course: Digital Literacy

University: VIT Bhopal

Date: 27 March 2026

This project focuses on developing digital literacy skills. It includes creating an infographic, building professional profiles, solving coding problems, writing professional emails, and learning about

cybercrime awareness. These tasks helped improve my understanding of safe and effective use of digital tools.

In Task 1, I created an infographic on digital literacy using Canva. The infographic explains safe internet practices and useful tools for students. This task helped me learn visual communication and design basics.

In Task 2, I created professional profiles on GitHub, LinkedIn, and Kaggle. I updated my bio, added education details, and captured screenshots. This task helped me build an online professional presence.

In Task 3, I created an account on HackerRank and solved the beginner problem "Solve Me First" using Python. This task helped me practice coding and understand online coding platforms.

In Task 4, I wrote two professional emails and created a social media checklist. This task

improved my communication skills and helped me understand professional email writing.

In Task 5, I created a case study on UPI fraud and a prevention checklist. I learned about common cyber threats and how to stay safe online. This task increased my awareness about digital security.

This project helped me understand digital literacy and safe internet practices. I learned how to create digital content, build professional profiles, communicate professionally, and stay aware of cyber threats. These skills will help me in my academic and professional journey.
